(Player List Page, Frontend)	Along with the header and footer, the player list page <ul style="list-style-type: none">- Lists each player that has competed in a tournament- Clicking on a player brings you to their player profile page.	Website Application Player Database	5.92	0.1525	H	Camelia
The user shall be able search for another player's details/stats. (Player List page)	The Player List page will have a search bar function, where a user can search for a specific player from the player list.	User Account Database Tournament/Event Database Individual Player Statistics Website Application	4.97	0.0902	L	Dorothy

Requirements

Software Requirement	Acceptance Criteria	Module	FP Score	Effort Score	Priority	Lead
The developer shall create the frontend for the Players Profile Page. (Player Profile Page, Frontend)	Along with the header/footer, the player profile <ul style="list-style-type: none">- Lists specific stats of the selected player (avg score on par 3/4/5)- Shows their past tournament scores.	Website Application	3.55	0.4466	H	Camelia
The developer shall create a photos page for the website. (Photos List Page, frontend)	Along with the header and footer, the photos list page has <ul style="list-style-type: none">- a list of past tournaments.- When each tournament is clicked on, the photos from the tournament are displayed.	Website Application Tournament Database	3.55	0.4466	M	Dorothy
The user shall be able to see photos from a specific tournament. (Tournament Photos page, frontend)	Along with the header/footer, the tournament photos page has <ul style="list-style-type: none">- A slideshow that shows all of the photos associated with that tournament	Website Application	4.97	0.0267	M	Daniel
The developer shall create a tournaments list page for the website. (Tournaments List Page, frontend)	Along with the header and footer, the tournaments list page has <ul style="list-style-type: none">- a list of past tournaments.- When each tournament is clicked on, the results from the tournament are displayed.	Website Application Tournament Database	3.55	0.4466	H	Dorothy

Requirements

Software Requirement	Acceptance Criteria	Module	FP Score	Effort Score	Priority	Lead
The user will be able to view season rankings on the Season Rankings page (Season Rankings Page, frontend)	Along with the header and footer, the season rankings page has <ul style="list-style-type: none"> List of players sorted by the number of points they've accumulated in the current season Able to see previous season rankings. 	Website Application Player Database Tournament Database	5.68	0.1347	H	Tori
The developer shall create an about us/contact page for the website.	Along with the header and footer, the About Us page <ul style="list-style-type: none"> describes what the group's ideals and goals contains the contact information of the group such as phone number and email. 	Website Application	5.04	0.0118	M	Daniel
The user shall be able to see stats/scores from previous tournaments.	Along with the header/footer, the tournament scores page has <ul style="list-style-type: none"> The complete list of players that competed in that tournament, sorted by best score. 	User Account Database Tournament Results Tournament/Event Database Website Application	10.78	0.1151	H	Daniel
The developers will create the frontend for the admin login portal. (Admin Login Portal, Frontend)	The frontend for the admin login portal will include a login screen and a recover password UI.	Admin Portal	2.84	0.0021	H	Daniel

Requirements

Software Requirement	Acceptance Criteria	Module	FP Score	Effort Score	Priority	Lead
The admin shall be able to log into their account. (Admin Login Portal, Backend)	The system verifies if the username/email and password entered is a valid account.	User Account Database Account Registration/Modification Website Application	7.40	0.2979	H	Camelia
The admin shall be able to edit their account details (email/password). (admin portal)	The system updates the changes made to the account in the database.	User Account Database Account Registration/Modification Website Application	6.93	0.0724	H	Camelia
The admin shall be able to create a future tournament form for users to sign-up. (Admin Portal, Home Page, Backend)	A form, along with a picture announcement, about the upcoming tournament will be shown in the home screen.	Tournament/Event Database Admin Portal Tournament Registration	8.25	0.1223	M	Tori
The developers will create the frontend for an admin posting an announcement. (Admin Portal, News, Frontend)	The frontend for posting the announcement will look similar to Beachboard announcements, simple.	Admin Portal	2.88	0.0052	H	Tori

Requirements

Software Requirement	Acceptance Criteria	Module	FP Score	Effort Score	Priority	Lead
An admin shall post events and announcements visible to all other users. (Admin portal, News, Backend)	Admin can post an announcement that will be posted to the BIG Golf Website, with the timestamp on when the announcement was posted.	Tournament/Event Database Announcements and Events Website Application	10.64	0.8854	H	Daniel
An admin shall view/edit a list of members and their information. (admin portal, players)	An admin can add to the list of members, or edit information/scores of a member.	User Account Database Individual Player Statistics Website Application	12.41	1.4048	M	Camelia
The developers will create the frontend for an admin uploading pictures from a tournament. (Admin Portal, Photos, Frontend)	The frontend for posting a picture will include selecting the photos that need to be uploaded, along with UI that shows which tournament it should be linked to.	Admin Portal Tournament/Event Database Club Pictures	5.04	0.0941	M	Daniel
The admin will post pictures from a tournament for a user to see. (Photos Page/Admin Portal, Backend)	Admins will upload images linked to a tournament through the admin portal. Each tournament features its core information (date/time/location). Any images uploaded to the tournament are displayed in the BIG Golf Website.	Tournament/Event Database Tournament/Club Pictures Website Application	7.92	0.3652	H	Tori

Requirements

Software Requirement	Acceptance Criteria	Module	FP Score	Effort Score	Priority	Lead
The developer will create the frontend for the admin to post scores from a tournament. (Admin Portal, Post Scores, Frontend)	An acceptable UI/UX will be made for the admin to enter their scores from the tournament. (Needed to enter a score: Player, Tournament, Tournament Scorecard).	Admin Portal Tournament Results Individual Player Statistics	5.76	0.0176	H	Camelia
An admin shall post scores from tournament. (Admin Portal, Post Scores, Backend)	An admin will post scores of all players from the previous tournament. Scores will be linked to the specific player and tournament, and saved to the database.	User Account Database Tournament/Event Database Tournament Results Golf Course Information Website Application	10.22	0.0981	H	Dorothy
